The Principal Addition to the Riverside to be Constructed on the Real Estate

ACQUIRED BY THE COMPANY

Just Below Boggs' Run-Much Property Already Bought and Other Tracts Wanted.

The Riverside Iron Works improvements and additions at its upper Benwood plant are of stupendous propor-tions. This much can be seen by what has been done already and is doing. The new pumping station is now progress-ing rapidly, as is the additional bi-pro-duct coke ovens, and at Boggs' run a force of about fifty men is at work walling up the run from the Baltimore & Ohio culvert westward toward the

As was related in the Intelligencer As was related in the intelligencer exclusively some time ago, the Riverside acquired for \$15,000 the Whiteman property in upper Benwood. Other property above the street, opposite the Whiteman tract has since been acquired, and the Riverside is now negotiating for more land, but it is stated quired, and the Riverside is now nego-tiating for more land, but it is stated that the negotiations may fall through on account of the exhorbitant prices which some of the holders are insisting

Secretary John D. Culbertson, of the company, when seen yesterday after-noon, was asked to outline for the In-telligencer the scope of the additions to the plant that are contemplated to be put up on the newly acquired ground orth of the already immense plant. He stated that the principal improvement contemplated is a 500-ton blast furnace, but the contracts have not yet been given. As to any other additions he would not commit himself at this time. The walling up of Boggs' run, he said, would be followed by the re-arrangement of the Pan Handle and Terminal tracks north of the present plant in order to give the company more room for the contemplated additions. The Riverside, he said, had re-cently acquired from the Pan Handle and Terminal companies their real es-tate holdings below the run with the exception of the rights of way for their trackage.
From all this it can be seen quite

readily that the National Tube Company (now owner of the Riverside) intends to make tremendous additions, which will greatly benefit this community in the distribution of great sums of money in construction and in a largely increased pay roll.

Valley Manufacturer.
The demand for pig iron and steel billets is a little easier than last week, says the current issue of the Ohio Val-ley Manufacturer. The shortage of says the current issue of the Ohio valley Manufacturer. The shortage of cars for transportation seems to cause delay in shipping orders. The small consumer is willing to pay a fancy price for his iron and steel and demands from this source are very numerous. The large buyers have secured material for the first half of next year, so that lower prices are not any nearer than a month ago.

Pig Iron.—While the price of pig iron has not advanced, there has been enough inquiry to keep the price steady and from the present outlook the prospects are better for an advance than a decline.

Billets.—The steel plants are not able to keep pace with the demand and firm prices are the rule; even prices for future delivery are shaded so little that no large sales are reported.

Finished Material.—The demand is very active and manufacturers have no difficulty in getting all the business they want at full rates. Steel rails are quoted at \$33, and it is doubtful if large quantities could be had at this price. Old Material.—Firm at an advance Some sales reported for steel rails, \$20 for lorn rails, \$23 for car wheels, and \$33 for axies.

the Virginia Gold Mining Company, in western Ontario, of which Messrs. Bam Hugh Brockimier and Edward Stifel are the principal officers and stockholders. According to the News, the strike was "wonderful," and "the ueln was considered almost solid gold." This was so ridiculous that the publication was greeted with the merry "ha! ha!" on all sides, and it was decidedly unnecessary for the gentlemen interested to enter a formal dental. However, to set themselves aright in their home, Messrs. Brockunier and Stifel called at the Intelligencer office last evening and made the following statement: "We are in the mining business legitimately and not for such notoriety as the News would give us. The reporter heard we had received a telegram from our manager, and being unable to seture any information from us he made his sensational story out of the whole cloth. The plain truth is just this: We are down 165 feet instead of 500, as the News states, and have made cross cuts at 100 feet and at 159 feet, and have found the values of the ore very fair, but nothing phenomenally rich. At 165 feet our men are now at work and have a splendid showing, but there is no solid gold; such a thing is absurd. We have things in first class shape for the winter, and we are going ahead steadily. We now have two of our own boats running on Sturgeon lake, which connect with the regular line of steamers on Lake of the Woods for Rat Portage, our base of supplies."

# CHURCH AND STATE.

Union Suggested by the Missionary Council of the Methodist Episcopal

ST. LOUIS, Oct. 26.-To-day's session of the missionary council of the Prot-estant Episcopal church at St. Peters, began with the usual religious services at the conclusion of which Bishop Tut-tle, of Missouri, introduced a resolution asking for the expulsion from the na-tional house of representatives of Brig-

ham H. Roberts, of Utah.

Bishop Whipple, the presiding officer, ruled the resolutions out of order, say-ing that the council had met for a specific purpose and could not consider

outside matters.
In course of an argument on a resc lution to make a rule requiring stated contributions to the missionary fund, which was defeated, Rev. W. McKnight, of Eimira, N. Y., commented on the ad-vantage of the English church over the American church because of its con-nection with the government and intimaied that he would like to see the union of the church and state in this country.

"I think our flag would look better if it also had a cross on it," he said. The report of the Woman's auxiliary nowed collections of \$49,138 for the

showed year. Bishop Gaylor, of Tennessee, read the report on the missionary work done among the colored people.

Bishop J. E. Cheshire, of North Carolina, in discussing the report, said the

colored people were growing worse instead of better. It was not expected, he said, that people set free because of a supposed political necessity should not retrograd; under the weight of responsibility they were not prepared to assume.

The resolution on the report declaring the appropriation of \$62,000 insufficient and recommending the appointment of

a field scoretary, was adopted.

The report of the American church missionary society urged the propriety of making larger appropriations for the work of the church in Cuba, where, it is estimated, there are 50,000 orphan children.

Rev. Dr. E. Estill said: "If this island does not become the property of the United States, which I hope it will, it certainly will become part of the terri-tory of Jesus Christ."

The diphtheria at Torkville is assuming rather large proportions, considering the size of the place. At the present time there are five cases, confined in two families and all rather serious. One death occurred from the disease last week. The strictest kind of quarantine rules have been established and guards have been placed at each house, on duty day and night.

It has been stated, but not authoritatively, that George W. Collins, who has been for a number of years freight agent at this place, will soon be removed to Steubenville. If this change occurs it is a promotion of which George is entirely worthy sind his many friends would be glad to learn of his advancement, but will be sorry to lose such a worthy gentleman.
